THE PROBLEM

Paper stamp cards are a broken promise.

Every small business knows the feeling: a customer loses their stamp card, the ink fades, or it just sits forgotten in a drawer. Loyalty built on paper isn't loyalty — it's just friction.

1

Lost & forgotten

Paper cards get misplaced, damaged, or abandoned before they're ever completed. Customers leave empty-handed, and businesses lose the repeat visit they were banking on.

85% of paper stamp cards are never completed

2

Zero customer data

With paper, the business has no idea who their loyal customers are, how often they visit, or why they stopped coming back. Every departure is a mystery — and a missed opportunity.

No insight into churn or repeat visit patterns

3

No delight, no magic

A paper card feels transactional, not personal. There's no moment of reward, no real-time progress, no celebration when a customer earns their free coffee. The experience falls flat.

0 memorable moments in the redemption journey

THE SOLUTION

Tap. Stamp. Reward.

Under 2 seconds.

Glyph uses NFC chips — the same technology as contactless payments — to stamp a digital loyalty card with a single phone tap. No app download needed. No friction.

01

Merchant registers an NFC tag

A small NFC sticker or puck is registered to a campaign in the Glyph dashboard in under 30 seconds. Assign it to a location, set your stamp target, and you're live.

⌚ Setup in under 30 seconds

02

Customer taps their phone

The customer holds their phone near the NFC tag. A web page opens automatically — no app required. They tap 'Stamp' and the loyalty card updates instantly on their screen.

📱 No app download required

03

Reward unlocks automatically

When the customer reaches their stamp target (e.g. 9 stamps), a unique QR reward code is generated. The merchant scans it at the counter — fast, secure, and fraud-proof.

📄 QR code redemption

FOR MERCHANTS

Everything you need. Nothing you don't.

The Glyph merchant dashboard puts campaign management, customer analytics, and NFC control all in one place.

Campaigns

Create unlimited stamp card programmes with custom targets, rewards, and expiry dates. Pause or archive campaigns at any time without losing data.

NFC Tag Manager

Register and manage NFC tags from a central hub. Assign them to campaigns and locations. Monitor tap counts and last activity in real time.

Customer Analytics

See who your regulars are, when they visit, and how loyal they are. Full tier breakdown: New, Silver, Gold, and VIP — with visit frequency and lifetime value.

Multi-location Support

Run loyalty across all your locations from a single dashboard. Each location gets its own NFC tags, analytics, and staff access — managed centrally.

Rewards & QR Redemption

When a customer completes a card, a unique QR code is generated. Scan it at the counter to redeem — fast, secure, and impossible to forge.

Settings & Billing

Customise your brand colour, business name, and location info. Upgrade or manage your plan directly from the dashboard — no calls required.

PRICING

Simple, honest pricing.

Start free. Scale when you're ready. No lock-in, no hidden fees, no surprise invoices.
